\*)An amusing coincidence—as I was helping Pramod, Sergio, Alberto, Tariq, among others construct this index, on MidSomer's Murders, murder's family motto was "Jamais vaincu" (i.e., Never Surrendered!—or maybe Never Conquered.)

\*\*) I recognized Peter Pappas because, as he told us, of a family gene-- his hair turned white when he was 22 years old.

\*\*\*) Franco Guerriero, our genial emcee for the banquet. (In Spanish, Guerrero means warlike, warring, or mischievous, so be careful!)

\*\*\*\*) Patrick Smith looked so cherubic I didn't recognize him at first!

Many faces are familiar but the shadows & the low resolution makes an ID iff. I recognized Peter Pappas because he told that a family gene turned his hair turned white when he was 22 or 23. I recognized myself from the generous lunch I had just eaten! The hat of the mathematician to the left of Sergio hid his face, but I saw it on a police poster somewhere. In fact that is probably why so many faces look familiar! Hmm. next time I go to the Post Office, I'll copy your names out. Ha-ha, Carl
